

CHRISTMAS CARNIVAL COSTUME

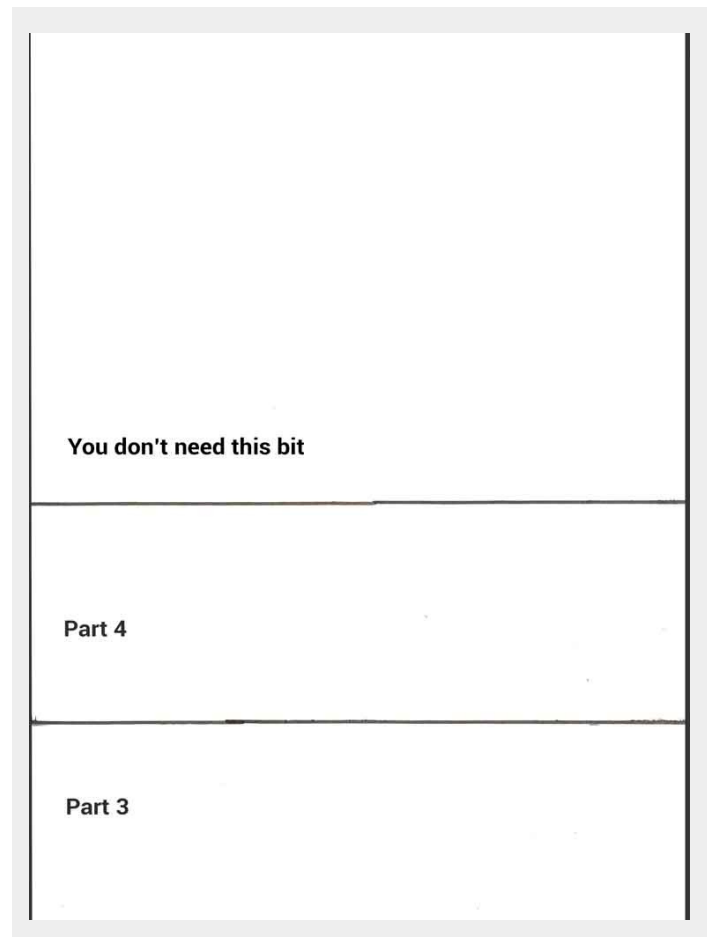

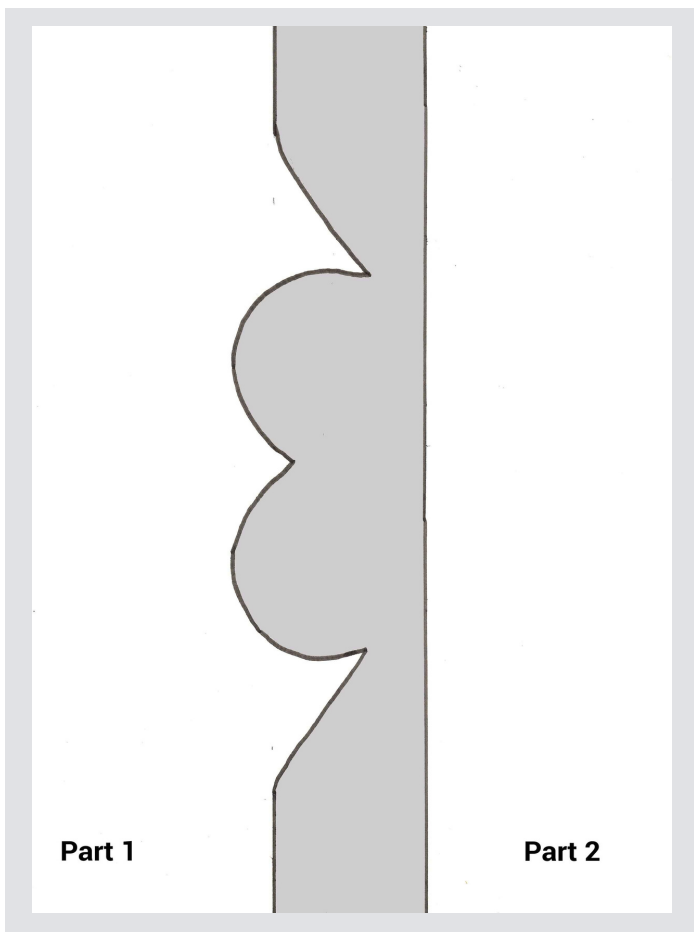

You will need

- A4 paper (and preferably a printer)
- Scissors
- Glue
- Glitter, optional

Create your headdress base

The first step for all the designs is to create the headdress base. You can do this with two pieces of A4. The templates for the base are on pages 6 and 7 of this booklet. You will end up with 4 pieces in total for your base.

To put your base together you first take part 1, and stick one side of part 2 to it. Then measure around your head to stick the other end of part 2 to the other side of part 1. This forms a crown shape, where the top of heart shape will sit above your eyebrows.

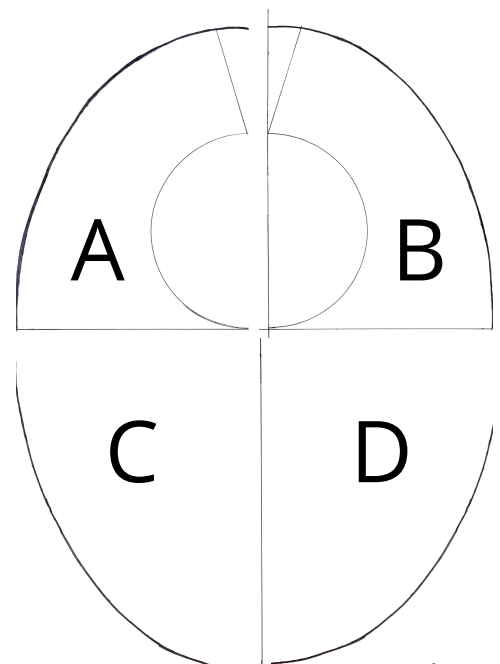

You then take part 3 and part 4 and glue them to the inside of your crown shape, so that one of them crosses over the other to form a top to your base like in the picture below.

Create your collar base

You can print out the four collar pieces you need on pages 8 to 11 of this booklet. Cut them out and then glue each piece together. As you can see in the picture below, there are 4 shape - A, B, C and D. Fix them together, by folding and using the tabs in the template, then you will end up with the correct shape!

If you don't have a printer you can copy the shapes below onto A4 by hand before cutting out.

Print and decorate your plants, trees and stars

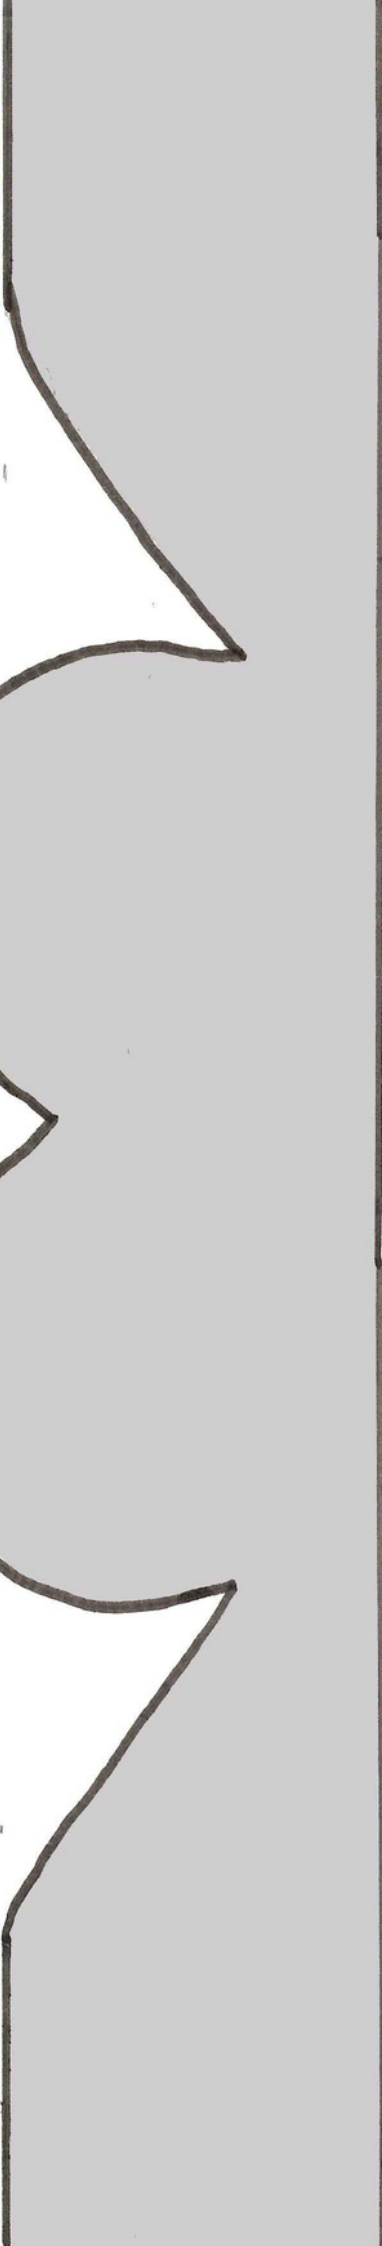

You can find templates for all the flowers, plants, trees and stars on pages 12 -15 of this booklet. It is good to print them out on different colours to get a really stunning effect. If you don't have different colour paper, you can still make this costume - just use white paper and paint your patterns. If you don't have a printer, don't worry - below you can see the patterns. You can just copy these out onto paper or card yourself before cutting out. Once you have cut out, and painted if necessary, the pieces you can then add a bit of sparkle to them with some glitter.
