

DINOSAUR CARNIVAL COSTUME

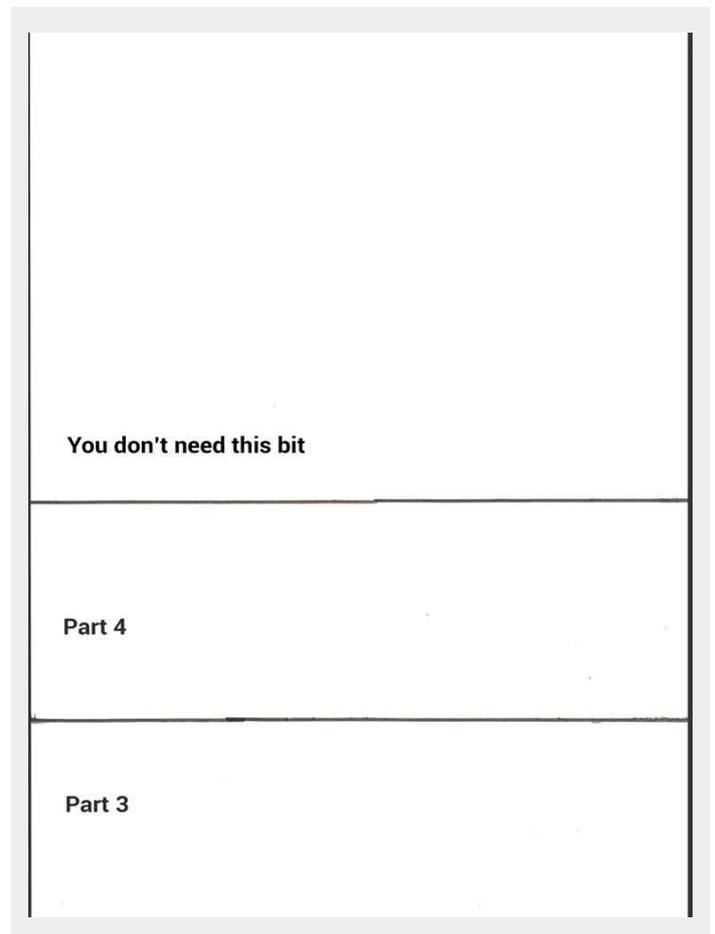

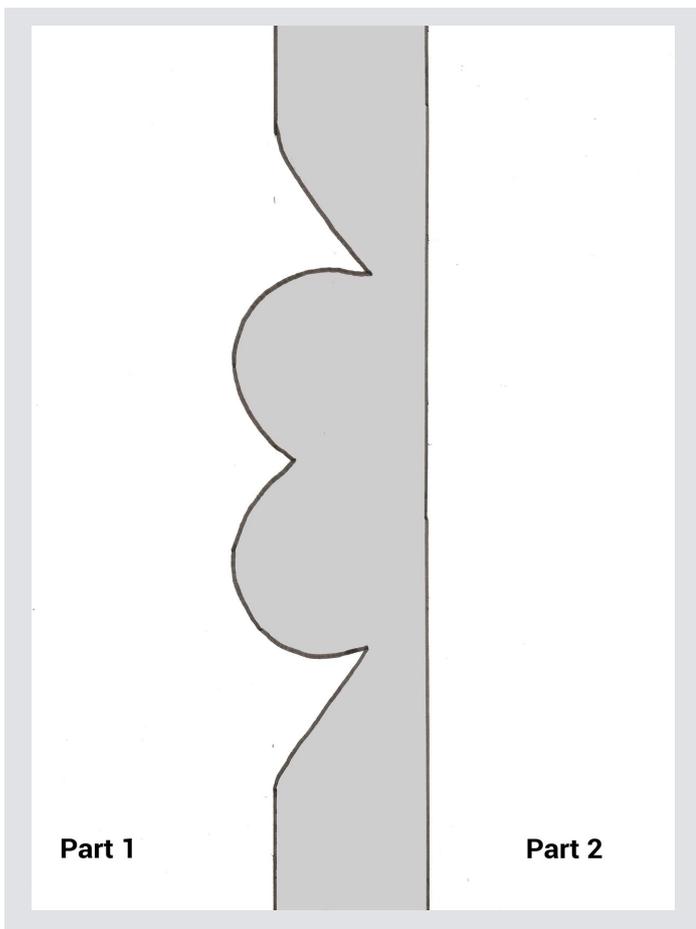

You will need

- A4 paper (and preferably a printer)
- Scissors
- Glue
- Paint and paint brushes

Step 1 - Create your headdress base

The first step for all the designs is to create the headdress base. You can do this with two pieces of A4. The templates for the base are on pages 8 and 9 of this booklet., You will end up with 4 pieces in total for your base.

To put your base together you first take part 1, and stick one side of part 2 to it. Then measure around your head to stick the other end of part 2 to the other side of part 1. This forms a crown shape, where the top of heart shape will sit above your eyebrows.

You then take part 3 and part 4 and glue them to the inside of your crown shape, so that one of them crosses over the other to form a top to your base like in the picture below.

Print out your dinosaur templates

If you haven't already, print out your templates (pages 14 onwards).

No printer? No problem! You can copy some of the designs or even make up your own dinosaur. Remember that for each dinosaur you want a left part of the head and a right side view so you can stick them to either side of your headdress when you have painted them.

Paint or colour your dinosaur head

Noone really knows what colour dinosaurs were, but some paleontologists say that dinosaurs' skin could have been all the colours of the rainbow - yellow, green, purple -even multi-coloured! So you can really get creative with your dinosaur and colour it however you like!

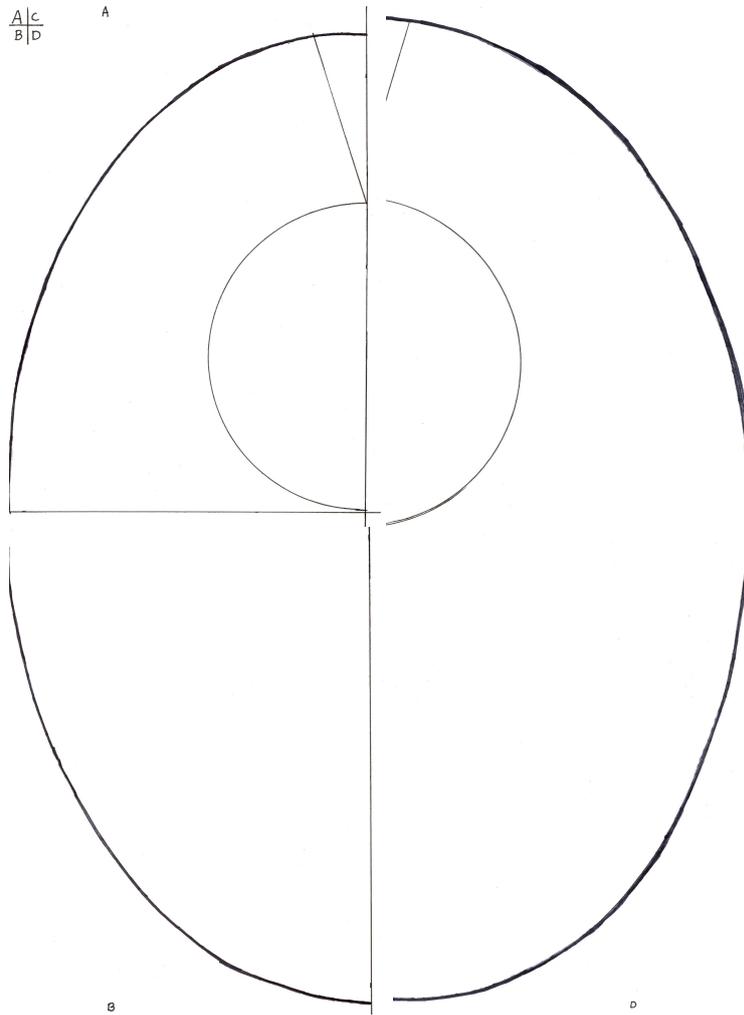

Cut out your pieces & glue them to your base

Once you have decorated your dinosaur heads, and any extras like volcano, trees or dino footprints (which you will find templates for on page xxxxx), you can then set about gluing them to your headdress.

For the collar base:

Print out the templates on pages 10-13 of this booklet. You will print out four pieces, or alternatively draw them on paper, cut them out and then glue each piece together. As you can see in the picture below, there are 4 shape - A, B, C and D. If you fix them together, by folding and using the tabs in the template, then you will end up with the correct shape!

Cut out and decorate your dinosaur designs

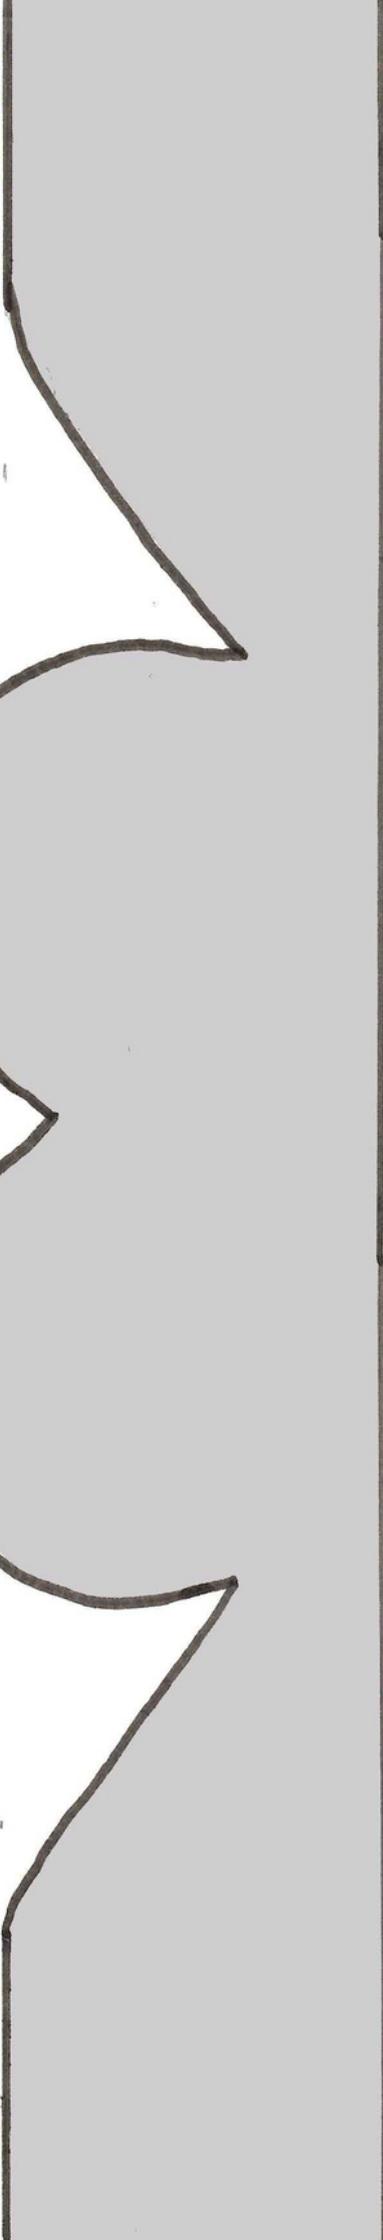

There are a range of designs you can choose from - you can find these on pages 14 onwards. Choose a lovely diplodocus, some volcanos, palm trees, dinosaur eggs and even dino footprints! Colour them all in, cut them out and then use them to decorate your collar. This is your chance to get really creative.
